

SHASHIKANT PANCHAL

Software Engineer

Mysuru, Karnataka, India | +91 93532 86353 | shashikantpanchal499@gmail.com | LinkedIn | GitHub

PROFESSIONAL SUMMARY

Software Engineer with 4+ years of experience architecting, building, and scaling cross-platform mobile applications (React Native, TypeScript) for iOS and Android. Proven track record delivering 5+ production apps from zero to App Store and Google Play launch, spanning enterprise LXP, multi-vendor commerce, and real-time/WebRTC systems. Deep expertise in enterprise SSO & payload encryption, serverless cloud architecture (AWS, Supabase, Firebase), and native Android/iOS build engineering. Builder of fully automated CI/CD pipelines with a strong record of solving hard native-layer problems others avoid.

CORE SKILLS

Languages: TypeScript, JavaScript (ES6+), HTML5, CSS3

Mobile Development: React Native (New Architecture, Fabric/TurboModules), Expo, Native Modules, Deep Linking, SSO (OAuth 2.0/SAML), WebSocket, WebRTC (LiveKit), NFC, Offline-First Sync

Frontend & State Management: React.js, Redux, Redux Toolkit, Redux Persist, Context API, React Navigation, Reanimated

Backend / Data & Cloud: Node.js, Firebase (Auth, Firestore, Cloud Functions, FCM), Supabase (Postgres, Realtime, Edge Functions), MongoDB, REST/GraphQL APIs, AWS Amplify, AWS Cognito, AWS Lambda, AWS S3

Payments & Hardware: Razorpay, ESC/POS Thermal Printing, NFC, Google Maps API, AES Encryption (crypto-js)

CI/CD & DevOps: Jenkins, Bitrise, GitHub Actions, App Store Connect / TestFlight, Google Play Console

Tooling & Native Platforms: Git, GitHub, Bitbucket, Jira, Android Studio (Gradle/CMake), Xcode, Flipper, i18n

WORK EXPERIENCE

Software Engineer | Excelsoft Technologies Pvt Ltd

Oct 2023 – Present

Mysuru, Karnataka, India

- Own the full software development lifecycle (SDLC) for cross-platform React Native applications, translating complex business requirements into technical specifications and architecting high-performance apps for iOS and Android using TypeScript and JavaScript (ES6+).
- Engineered enterprise-grade features including **SSO (OAuth 2.0/SAML)**, deep linking, and a live exam module for large organizational client groups; hardened sensitive user flows with **encrypted storage** (Keychain, EncryptedSharedPreferences).
- Integrated data layers using **GraphQL (Apollo Client)** and RESTful APIs (Axios); managed local and global application state with Redux Toolkit and React Context API.
- Built automated **CI/CD pipelines** using Jenkins and GitHub Actions, streamlining automated testing, builds, code signing, and deployments to the Apple App Store (App Store Connect/TestFlight) and Google Play Store.
- Diagnosed and resolved complex platform-specific build and linking issues in Xcode (**CocoaPods, Swift, Objective-C**) and Android Studio (**Gradle, Java, Kotlin**), demonstrating expertise beyond the JavaScript layer.
- Led cross-functional squads of UI/UX designers, backend engineers, and QA testers as **technical lead** — orchestrating sprint workflows in Jira, conducting code reviews, and establishing engineering standards.
- Optimized app performance using React Native Debugger, Flipper, and React Reanimated, consistently delivering smooth **60 FPS** user interfaces and secure, user-centric mobile applications.

React Native Developer | Mufeed Products and Services Pvt Ltd

Dec 2022 – Oct 2023

Bidar, Karnataka, India

- Architected, engineered, and launched a full-featured **SaaS e-commerce mobile platform from scratch** using React Native and Firebase (Authentication, Firestore, Cloud Functions), delivering a high-availability solution deployed to both the Apple App Store and Google Play Store.
- Designed and implemented core product features including real-time product search and dynamic filtering, an intuitive shopping cart and checkout system, order tracking, a personalized user profile dashboard, and Firebase Cloud Messaging (FCM) for automated push notifications on order updates and promotions.
- Integrated complex RESTful APIs and third-party services for critical platform workflows, including secure payment processing with **Razorpay** and inventory synchronization, while managing application state with Redux Toolkit for a seamless, reliable user experience.
- Implemented **enterprise-grade security protocols**, optimized application load times, and resolved native platform issues using Xcode and Android Studio to ensure peak stability and performance.
- Collaborated within an Agile framework using Git, Bitbucket, Jira, and CI/CD pipelines (Jenkins, GitHub Actions); conducted thorough code reviews, established robust testing standards, and continuously shipped scalable feature enhancements for a multi-tenant SaaS environment.

KEY PROJECTS

Saksham Pro — Enterprise Learning Experience Platform (LXP)

Jan 2025 – Present

[Play Store](#) | [App Store](#)

- Architected and scaled an enterprise LMS app (React Native 0.86, React 19), integrating **AWS Amplify v6** and **AWS Cognito** for serverless, multi-tenant authentication and API infrastructure.
- Engineered a custom enterprise SSO with deep-link payload extraction, **double-ended AES token decryption** (crypto-js), and AWS API Gateway auth across employee and external-org login channels.
- Built a multi-format course player (video, HTML5 slides, embedded PDF) with sequential learning paths and completion logic, plus a live e-test/quiz engine with real-time timers, instant grading, and admit-card generation.
- Designed a gamification engine — coin wallet, rewards marketplace, auto-generated badges/certificates — with peer-comparison analytics and company-wide leaderboards.
- Resolved critical **Android 15 (16KB page size)** native crashes via ELF page alignment, and authored **custom Gradle/CMake automation** fixing C++ Codegen/autolinking build failures.
- Implemented offline-first architecture (Redux Persist, NetInfo) and optimized media rendering with FastImage, Lottie, and SVG visualizations.
- Tech stack: React Native 0.86, React 19, Redux Toolkit, Redux Persist, AWS Amplify v6, AWS Cognito, Firebase FCM, React Navigation v7, react-native-pdf, crypto-js, Lottie.

Finecart — Multi-Vendor E-Commerce & Merchant Ecosystem App

Apr 2023 – Aug 2023

[Play Store](#) | [App Store](#)

- Engineered a feature-rich multi-vendor app (React Native, Redux Toolkit, Redux Persist) supporting shopping, merchant store management, real-time calling, and hardware receipt printing.
- Built an enterprise-grade **POS thermal printing engine** (~1,350 LOC) using react-native-esc-pos-printer, supporting Bluetooth, USB, and Network printers with automatic and manual receipt generation.
- Integrated **LiveKit WebRTC** for peer-to-peer voice/video calling with push-notification call routing and custom native Android **Picture-in-Picture (PiP)** support.
- Architected location-based marketplace resolution (Google Maps API, geolocation) to dynamically scope vendors/products by user coordinates, plus stateful multi-store cart-guard logic.
- Implemented secure token management via custom Axios interceptors and hardware-encrypted storage, NFC tag scanning, and Razorpay-powered family/child wallet payments.
- Configured Firebase Cloud Messaging with native Android/iOS notification engines for deep-linked alerts, order updates, and incoming-call handling.
- Tech stack: React Native, Redux Toolkit, Redux Persist, Axios, LiveKit WebRTC, react-native-esc-pos-printer, NFC, Razorpay, Google Maps API, Firebase FCM.

Upāsana — Cross-Platform Spiritual Companion App

Dec 2025 – Feb 2026

[Play Store](#)

- Engineered a cross-platform app (React Native 0.81, Expo 54, React 19) with **New Architecture and React Compiler** enabled for zero re-render overhead and fluid 60 FPS UI.
- Architected real-time multiplayer Japa chanting rooms using **Supabase Realtime WebSockets/Postgres** with role-based room management and synced counter states.
- Built a serverless Panchang & Muhurta scoring engine (Supabase Edge Functions) computing Tithi/Nakshatra/Yoga/Karana from dynamic GPS location, with multi-year offline fallback databases.
- Designed a dual-API fallback architecture for scripture content (primary + backup API, in-memory caching, static JSON fallback) for zero-downtime reading.
- **Authored custom Expo Config Plugins** (Node.js) to patch native Android build.gradle/AndroidManifest.xml at compile time, resolving Firebase messaging manifest conflicts.
- Built a hybrid FCM + Expo Notifications engine syncing push tokens with Supabase profiles for scheduled alerts; integrated Razorpay payments and i18next multilingual support (English/Hindi).
- Tech stack: React Native 0.81, Expo 54, Redux Toolkit, Supabase (Postgres/Realtime/Edge Functions), Reanimated v4, Firebase FCM, Razorpay, i18next.

EDUCATION

Bachelor of Computer Applications (BCA)

Jun 2019 – Aug 2022

Doddappa Appa College of BCA, Basavakalyan
